PROFILE

Passionate and self-taught **Fullstack JS developer** with **8 years of experience**. I enjoy learning and solving complex technical problems.

This resume was made with my web app: onlineresume.dev

WORK EXPERIENCE

Resilience (www.resilience.care)

Lead Frontend Dev • Remote

Nov 2024 - May 2025

I worked as a **Lead Frontend Developer** within a team of 5 developers to rapidly build an **MVP** (Minimum Viable Product) **from scratch** in the field of psychiatry:

- Autonomously designed the frontend architecture
- Supervised a team of junior frontend developers
- Validated and reviewed pull requests
- Developed the user interface using **Next.js (App Router)** while ensuring accessibility compliance
- Coordinated with the backend team (2 devs) to define the API routes
- Collaborated with the design team (2 designers) for the integration of Figma mockups
- Transferred knowledge at the end of the project to internal teams (documentation written on Notion, handover meetings, etc.)

Achievement → MVP delivered after about than 4 intense months of development

Tech stack: Next.js (v14) with app Router, TypeScript (v5), Nx (monorepo), SCSS, Vitest, Figma, ...

OnlineResume.dev

Founder • Paris, France

July 2024 - Ongoing

Development of a no-nonsense web application allowing users to create resumes in PDF format easily.

Key features:

- Intuitive user interface
- 2 resume templates available
- Support for the most common resume sections (contact info, work experience, education, skills, etc.)
- Automatic draft saving using localStorage

- Fast generation of high-quality PDF resumes
- Responsive design for access on desktop, tablet, and mobile

I created it because I found existing solutions frustrating, either due to high monthly costs (up to €30!.) or the hassle of editing outdated PDFs in Word/Excel/Photoshop or with free, limited tools.

Tech stack: React, TypeScript (v5), Vitest, Express, Node.js, SQLite, Puppeteer, Stripe, Docker, Nginx, Github Actions

Christian Dior Couture

Senior Frontend Developer (Contractor) • Paris, France
Aug 2023 - June 2024

As a Senior Frontend Developer within the Catalogue & Navigation team at Dior (E-Commerce website), my key responsibilities included:

- Independently developing new features in collaboration with multiple internal teams (design team, DevOps, etc.) at Dior, requiring strong collaboration and communication skills.
- Responsible for bug resolution and codebase improvements
- Improving the accessibility and performance of Dior's main E-Commerce website.
- Review of PRs

This role allowed me to enhance my frontend development skills while working in a collaborative and agile environment within a globally renowned company like Dior.

Technical stack: Next.js (version 14), Typescript (Version 5), GraphQL, SCSS, Jest, Figma, Storybook, ...

Way.co (B2B SaaS)

Freelance Fullstack Developer • Paris
May 2023 — June 2023

Short-term freelance mission with American startup Way.co, focusing on implementing a new customers dashboard in Next.js.

Conducted the majority of communication in English.

Tasks included:

- Autonomously developing new Next.js pages to enhance the dashboard functionality
- Creating and refining React components in alignment with provided design specifications
- Collaborating closely with the backend (NestJS) developer to establish or modify API routes
- Conducting rigorous testing procedures to ensure the functionality and usability of newly implemented application features

Technical stack: Next.js, React, Typescript, Styled components, Redux toolkit, NestJS, Postgresql, Vercel, ...

Independent Consultant

(Freelancer on Malt.fr) • Paris
Jan 2023 — May 2023

I carried out various short-term assignments for companies seeking expertise in frontend web development, particularly with Next.js/React, vanilla JavaScript, and Progressive Web Apps (PWAs).

Examples of types of assignments:

- Converting simple websites into PWAs
- Supporting a less experienced developer with vanilla JavaScript on behalf of a web agency
- Assisting less experienced developers with Next.js and React to go live and deploy an online directory of international cosmetic clinics

Office français de l'immigration et de l'intégration (OFII)

Lead Frontend developer and React Consultant • Paris

Feb 2022 - Dec 2022

Lead Frontend developer in a project for digitizing family reunification procedures within the French Office of Immigration and Integration.

Achievements:

- Developed dynamic form tunnels (using react-hook-form library) while ensuring adherence to accessibility criteria (RGAA norm)
- Migrated forms from Formik library to React-hook-form
- Put in place a design system using Storybook
- Contributed to the drafting of User Stories
- Responsible for frontend code quality and application performance
- Mentored less experienced developers on the frontend and particularly React
- Reviewed PRs
- Integrated Matomo audience analysis tool
- Improved documentation

This project was also an opportunity for me to significantly strengthen my knowledge **Docker**, which played a central role in the project.

Technical stack: React, Redux, Typescript, Styled-Components, Reach-UI, PHP, Symfony, Docker, PostgreSQL, GitLab.

EkWateur (fournisseur d'énergie verte et renouvelable)

Frontend Developer (Contractor) • Paris

Dec 2020 - Jan 2022

Projects:

- Developed a client portal for professional customers **from scratch** using React.
- Occasional interventions on other Ekwateur websites.

Achievements:

- Released the first version of the client portal 7 months after joining the team.
- Implemented unit tests (Jest) and functional tests (react-testing-library).
- Enhanced client cache strategy, resulting in reduced application loading time.
- Collaborated with the Design team on drafting User Stories.

Technical stack: React, Typescript, Redux Toolkit, styled-components, React-testing-library, GitLab, ...

Le Figaro

Frontend Developer (Contractor) • Paris

Dec 2019 - Dec 2020

As a member of the video team, I contributed to the development and deployment of the new portal built with Next.js (video.lefigaro.fr).

- Developed React Components in collaboration with the design team
- Developed numerous new features aimed at standardizing various video players and ensuring the stability of the final product.
- Contributed to maintaining libraries responsible for displaying advertisements on the main website of the newspaper (**Vanilla Javascript** DOM manipulation).

Technical stack: React, Next.js, Typescript, Javascript, Webpack, Babel, Sass, Jest, ...

Canal +

Fullstack JS developer • Issy-Les-Moulineaux

May 2018 - Dec 2019

Projects:

- Canal Set Top Box (STB) (released in January 2018)
- Canal Mini STB (released in October 2019)

The Canal 4K STB integrates all the channel's services (satellite, streaming, replay, VOD), featuring a web app interface entirely developed using React.

Achievements:

- Developed new features for the Canal STBs, both in React and Node.js.
- Collaborated with Middleware and Hardware teams for development needs.
- **Pair programming** in an autonomous duo for the release of the G9 mini (development, under a tight deadline, of numerous crucial **Node.js** modules for the G9 mini launch)
- **Improved performance** of certain app pages (e.g. using list virtualization).
- Conducted validation tests for each beta version at the end of each sprint.
- Publicly presented new features in front of an audience at the end of each sprint.

Technical stack: React, Redux, Redux-observable, Typescript, RxJs, Server Sent Events, RxPlayer (Dash library), Node.js, Jest, ...

Tracktl

Fullstack JS developer • Paris, France

Dec 2017 — May 2018

Fullstack web developer, I worked on a web and mobile (**React Native**) application that allows users to organize and manage musical events.

My tasks:

- Development of new features (e.g. an online planner, contribution to the mobile app development in React Native)

- Participation in client presentations
- Improving the codebase through refactoring and bug fixing

Tech stack: React, React Native, JavaScript, Redux, Redux-thunk, SCSS, Node.js/Express, Git

EDUCATION

Epic React course by Ken C. Dodds • Epicreact.dev

Jun 2023 - Sep 2023

Completed Epic React by Kent C. Dodds, an advanced online course designed for experienced developers. Deepened expertise in React, focusing on:

- Advanced state management techniques and custom hooks
- Performance optimization strategies for large-scale applications
- Implementing robust testing practices using React Testing Library
- Architecting complex, scalable React applications
- Advanced patterns for component composition and code reuse

React Nanodegree • Udacity

Dec 2017 - Feb 2018

Full React certification (React, React Native, Redux, etc.)

Master In Management • ESCP Business School

2012 - 2016

Corporate Finance Specialisation

Classe préparatoire HEC • Lycée Descartes

2009 - 2012

Successfully passed the final exam by getting accepted at ESCP Business School (Ranked 3rd in France)
